## IWCC Statistical Bulletin

The IWCC Statistical Bulletin contains production, demand, import and export data for the main semi-manufactures for the following countries:

Australia	Germany	Mexico	Spain
Austria	Greece	Poland	Switzerland
Benelux	Hungary	Portugal	Taiwan
Brazil	Iran	Russia	Turkey
Czech Republic	Ireland	Scandinavia	UK
China	Italy	South Korea	USA
France	Japan	Slovakia	

Production data have been supplied by National Groups, trade data are taken from either national customs or in the case of Member States of the EU, Eurostat.

Apparent Domestic Consumption (ADC) is calculated as production plus imports less exports. Adjusted consumption takes account of trade misclassifications and 'double counting', that is material which is part-finished in one country and exported and finished in another.
